# Fábio Ferreira

Fullstack Web Developer

### Summary

I'm a Fullstack Developer with a focus on Frontend. Guided by a foundation in design and a career in cybersecurity, I create web solutions that prioritize both aesthetics and resilience. With 4 years of professional experience and more than 6 years coding.

For a more detailed view of my work (tech used and other details), visit my portfolio at <https://fabio-ferreira.vercel.app>

## Professional Experience

### Fullstack Developer | Security Consultant 2022 - Present *Layer8 | Cybersecurity company*

- Lead developer for the company's component library, ensuring consistency and scalability across all projects.
- Lead developer for a cloud management project that centralizes the company's services, integrating features like user management and service management.
- Contributed significantly to redesigning and restructuring projects to align with the new design guidelines and component library, enabling better adoption across all platforms.

### Freelancer 2021 - Present

- Redesigned existing websites to improve usability, aesthetics, and performance, creating a stronger online presence for clients.
- Delivered various creative solutions, including graphic design and multimedia projects, ensuring a cohesive and polished result for every task.

### Front-End Developer | Programmer Assistant 2021 *Gestix | Invoicing company*

- Rebuilt and redesigned the company's main website.
- Developed a customizable, UI/UX-friendly website template for clients.
- Redesigned the backoffice interface to improve usability and customer satisfaction.
